## Light Anti-Aircraft Troop

## Light Anti-Aircraft Troop

## Light Anti-Aircraft Troop

This ORBAT represents the vehicles found in an anti-aircraft regiment in either a motor rifle or tank division. Weapon and vehicle numbers are exact but SSV type and position are based upon known standards and an educated guess. The odd size difference between the 85mm gun (small) and the 57mm (large) is real. This document was made from unclassified material and no vehicles were killed or injured during its construction.
